443.839.4058

I'm a Front-end Web Developer interested in animations, accessibility, and (web) apps. I seek to approach problems and unfamiliar challenges through creativity, curiosity, and constancy.

SKILLS

Experienced with JavaScript, React, jQuery, HTML, Svelte, Tailwind, and CSS

Familiar with Gulp, Git, Anime.js, Vue, Zapier, and various AWS services

Quick learner, efficient communicator, high attention to detail

WORK EXPERIENCE

Senior Front-end Web Developer | 10/2019 –

Agora | Baltimore, MD

In addition to previous responsibilities, developed and expanded multiple internal tools.

Built and maintained the front-end of a real-time revenue and send reporting tool using React, Chart.js, and Zapier for Slack integration

Built and maintained an interface to facilitate communication between copywriters and designers using Zapier to send form results through email

Built an API used to store and retrieve customer questions and comments during and before broadcast events using AWS Lambda, API Gateway, and DynamoDB

Front-end Web Developer | 5/2018 – 10/2019

Agora | Baltimore, MD

Responsible for building and maintaining order forms, signup pages, microsites, and landing pages. Collaborated with designers, developers, writers, and marketers. Trained and managed new developers.

Moved the company from Foundation to a custom, leaner stylesheet

Wrote and compiled documentation for common patterns and tasks

Wrote functions that automated tedious deadline updates on landing pages

EDUCATION

Bachelor of Arts

Goshen College, Goshen, IN | 2000-04

Major: Music | Minor: Writing
